CHRONIC DISEASE MANAGEMENT

Transforming patient self-management, resulting in sustained behavior change, better outcomes and improved quality of life

- **Innovative strategies** for working with non-adherent patients living with chronic disease
- **Patient self-management skills** to promote sustained outcome improvements
- **Integration of "High-touch" approach** to provide intensive management with those most at risk for hospital readmission
- **Evidence-based interventions** built on adult learning and motivational principles
- **Health literacy** assessment and intervention tools specific to each individual patient's chronic disease
- **Technology** for effective patient management and ongoing clinical oversight by specially-trained PATHlink nurses and therapists

EMPOWER YOUR PATIENT! THINK…
